Bus transportatio/flight over the lines and return to Lima

**Flight over the Nazca Lines:** Just two hours from Ica, 50 square km of desert floor were covered centuries ago by vast drawings, figures of mammals, insects and deities. The Nazca Lines, discovered in 1927, are the most extraordinary legacy left by a culture that flourished in 300 BC. The lines are a series of complex designs, some up to 300 meters long which can only be seen in their true dimension from the sky, from an altitude of at least 1,500 feet.
